

SUNFIND RV CHARGING KITS

SUNFIND RV Charging Kits are designed to give you complete freedom while enjoying the RV lifestyle. SUNFIND RV Kits silently charge your batteries so you can enjoy the comforts of home while enjoying the soothing sound of the outdoors.

Why SUNFIND RV kits out power the competition

Solar Module: SUNFIND RV kits use superior modules that provide industry leading performance with a 25 year warranty

Mount: All SUNFIND RV kits include an adjustable mount. This allows the mount to be easily tilted either direction during extended stays.

Controller: All SUNFIND RV Charging kits come with a "Flush Mount" controller. This allows you to integrate the controller into a mounting location giving a sleek, clean installation while providing digital readout of battery condition on solar production

Wiring: All electrical cable provided is an industrial grade cable that is resistant to Sun, oil, and water. All this results in wiring that won't crack and corrode.

Why Choose a SUNFIND RV kit?

SUNFIND RV kits are designed to provide reliable, long term power solution for your RV. SUNFIND RV kits are constantly charging your batteries giving you the power to run furnace fans, lights, TV's and many more DC applications while being able to withstand the demands of the RV environment and provide you with peace of mind that your SUNFIND RV kit will be meeting your power requirements for years to come. Also, in addition to our RV charging kits, we provide a comprehensive line of inverters, fuses ,and batteries to meet the demand for portable power products.
